Q11: Do you have any comments?

Leave a comment on the annotation task based on the following scenarios:

- If the query or response was unintelligible or in another language than the target language.
- If you have marked 'Yes' in Consistency for broad queries where you were able to find evidence for a majority of the response. It is mandatory to capture the statements for which you were not able to find the evidence here.
- If you have not preferred a response. Leave the reason(s) for the same here.
    - *Example:* Response B was not preferred because it violated the 'Medical' sub-dimension of 'RCPC'
